

**Cut out from:**

**NPG Library: Structural Biology: Nature Milestones in Crystallography**

**<https://www.nature.com/milestones/milecrystal/library/structural-biology/index.html>**

• **Structure of the nucleosome core particle at 7 Å resolution**

T. J. Richmond, J. T. Finch, B. Rushton, D. Rhodes and A. Klug

Journal:Nature **311**, 532-537(1984); doi:10.1038/311532a0

- [Abstract](#) |
- [PDF \(892kb\)](#)

• **Structure of the protein subunits in the photosynthetic reaction centre of *Rhodospseudomonas viridis* at 3Å resolution**

J. Deisenhofer, O. Epp, K. Miki, R. Huber and H. Michel

Journal:Nature **318**, 618-624 (1985); doi:10.1038/318618a0

- [Abstract](#) |
- [PDF \(1,251kb\)](#)

• **Dynamical transition of myoglobin revealed by inelastic neutron scattering**

Wolfgang Doster, Stephen Cusack and Winfried Petry

Journal:Nature **337**, 754-756 (1989); doi:10.1038/337754a0

- [Abstract](#) |
- [PDF \(378kb\)](#)

• **Free *R* value: a novel statistical quantity for assessing the accuracy of crystal structures**

Axel T. Brünger

Journal:Nature **355**, 472-475 (1992); doi:10.1038/355472a0

- [Abstract](#) |
- [PDF \(433kb\)](#)
